

ENERGY EFFICIENCY SOLUTIONS

INNOVATION-DRIVEN COMPANY

Founded in 2012 by a young, innovative and passionate team, but moreover highly interested in the field of energy efficiency, EXE Green Holding, member of the Romanian National Committee on Illumination, has quickly evolved thus becoming one of the leading companies in the industry of energy efficiency and LED lighting solutions. EXE Green Holding offers energy efficiency solutions for any type of industry at quite affordable costs.

The main industries which use our solutions are construction (residential and office), hospitality (already having some important hotel chains in our portfolio) and retail (the big supermarket chains which are starting to look for energy efficiency and LED lighting solutions like those that we offer).

KEY BENEFITS

A reduction of up to 50-85% with energy bill costs compared to the situation of using incandescence lighting fixtures.

A large variety of LED products to be used for your location, according to the lighting design you decide to use; the LED products can be mounted on your current electricity network (you don't have to install or modify anything).

Personalized lighting design, projected for your space or building.

Access control, video surveillance and intrusion detection.
